

OFFICE AIR CLEANER AND IONIZER AE 2000

The AIRONIC AE 2000 is a complete air re-conditioner that combines the effect of ionisation with a revolutionary electrostatic filter system that attracts pollution particles like a magnet.

The Aironic AE 2000 replaces essential negative ions and removes cigarette smoke, dust particles, bacteria and odours. The result is a clean healthy air flow where ever you go. Now you can reduce the likelihood of flu, coughs and colds and gain instant relief from asthma. Use the AE 2000 in your office or home, it's the ideal companion for both you and your computer. It counteracts the ion depletion effects of air conditioning, circulates stale air, cuts static, dirt and dust. And allows you to stay fresh, alert and productive.

CLEAN FRESH AIR IN MINUTES

Australian-made Aironic Air Cleaners and Aquanic Water Purifier products lead the world. They are fully tested and guaranteed for two years. You can see and breathe the difference with Aironic.

AIRONIC

Products for Life

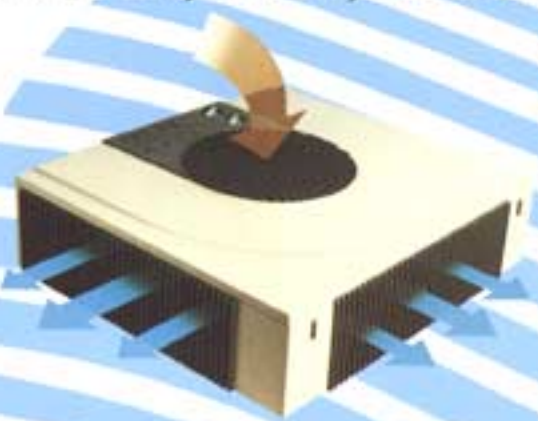

The Aironic AE 2000, versatile air cleaner and ionizer. Just plug it in for clean, fresh, healthy air in minutes.

Four speed, whisper quiet fan sucks dirty air in.

Replaceable filter cartridges allows air to pass through easily and yet trap even the smallest dirt particles by a combination of mechanical and electrostatic filtration.

Ion emitter needles release negative ions into the filtered air, clearing it of positively charged pollutants and restoring the natural balance.

The three emitter needles will need to be replaced periodically as the tips erode slowly during ion production. To replace them, firstly remove the power cord from its outlet. Use a small pair of pliers to pull the needles from their sockets. Replacement is the reverse of this procedure. Once the emitters have been replaced do not touch them, especially if the unit is operating.

TECHNICAL SPECIFICATIONS

MODEL	AE 2000
DIMENSIONS	473mmW x 416mmD x 130mmH
WEIGHT	4.8kg
INPUT	240vAC, 50Hz
POWER CONSUMPTION	84W max
OUTPUT VOLTAGE	Variable 5KV to 8.75KV DC nominal
EFFECTIVE RANGE	100sqM
ION OUTPUT	1,000,000/cc @ 1m
EMITTER CONFIGURATION	3 Needles, 270 degree coverage
FAN	4 speed, Centrifugal backward curved
FILTER TYPE (replacement)	Electrostatically charged polypropylene fibre with optional activated carbon
FILTER SIZE	0.39sqM
FILTER EFFICIENCY	99% @ 1 micron, 93% @ 0.3 micron
CASING	Polycarbonate
FILTER LIFE	Up to 6 months
MOTOR CAPACITY	570m3/hr
REPLACEMENT PARTS:	Filter Cartridge: AEF 2000 Emitter Needles: AEN 2000

Specifications subject to change without notice.
